

Tolu Adegboyega

FRONT END DEVELOPER

ABOUT ME

Tolu Adegboyega is a front end developer looking for opportunities to build things that help people, as well as the chance to keep learning.

PROJECTS

Markdown Previewer

Simple markdown previewer that shows sentences written with markdown in the left editor in real time in the right preview. Built with REACT.JS and SCSS.

To-Do List

Web-based to-do list app made with REACT.JS and Material UI.

Drum Machine

Fun drum machine made with REACT.JS, Web Audio API and SCSS.

Random Quote Machine

Inspiring quotes at the click of a button with an option to share as a tweet. Built using HTML, CSS, BOOTSTRAP and JQUERY.

[For more projects, please check out my Gitub.](#)

SKILLS

REACT JAVASCRIPT MATERIAL-UI HTML
CSS SASS BOOTSTRAP JQUERY
GIT/GITHUB AWS-AMPLIFY

WORK EXPERIENCE

Front-end Developer

July, 2020 - Present, KloudHQ

- Working closely with the design team, product management, and development teams to create elegant, usable, responsive and interactive interfaces across multiple devices.
- Turning UI/UX design wireframes into code and creating excellent interactions from designs.
- Building stable and maintainable codebases using React, modern CSS techniques and Javascript libraries.
- Collaborating with back-end developers and web designers to improve usability.
- Working in team environments that use Agile methodologies and tools such as JIRA.
