ABOUT ME

Frontend developer with experience building aesthetically pleasing, functional, high-quality and scalable products. I am passionate about delivering amazing user experience.

SKILLS

React	Vue	TypeScript
Redux	GraphQL	JavaScript
HTML	CSS/SCSS	Material UI
Element UI	Tailwind	Bootstrap
Styled Components	Firebase	Git/GitHub

EXPERIENCE

Frontend Engineer   Jan 2022 - Present

Tix Africa

- Conduct software testing, resolve bugs, and provide customer support.
- Optimize web pages for maximum speed and scalability.
- Developed and optimized front-end for admin dashboard v2, enhancing user experience and functionality.
- Implemented website redesign to improve overall design and usability.
- Collaborated with developers to create new features, such as the no-code website builder Tix Box Office.
- Worked in team environments that used Agile methodologies and tools.

Frontend Developer

GatePass   Mar 2021 - Jan 2022

- Collaborated with design, product management, and development teams to create elegant and responsive interfaces that enhance user engagement and operate seamlessly across multiple devices.
- Expanded features, refined code, and optimized processes to deliver high-quality, scalable, and performant products that offer an intuitive and delightful user experience.

Frontend Developer   Jul 2020 - Feb 2021

KloudHQ

- Designed web applications according to client briefs and modified designs to meet changes in client specifications.
- Built stable and maintainable codebases using React, modern CSS techniques and JavaScript libraries.
